

As wind turbines continue to grow higher so too do the safety demands for those working on them.

In accordance with the law, all wind turbine lifts and fall protection systems must be inspected once a year. It is the responsibility of the wind turbine owner to carry out this annual inspection. Avanti is an authorised wind turbine service and safety provider and an international market leader in the field. A service agreement with us is your guarantee of wind turbine safety.

### **Safety you can rely on**

Our market-leading position gives us a clear advantage in terms of the necessary competencies to service our customers. As wind turbines continue to grow higher so too do the safety demands for those working on them. A professional and authorised company such as Avanti gives you safety you can rely on.

### **Documentation and repairs**

Wherever possible, documentation for inspection and any repairs is issued on-site. Where this is not the case, we furnish documentation at a later date in accordance with the service agreement. We also provide authorised service inspections for other makes of lift and ladders.

A professional and authorised company such as Avanti guarantees your employee safety.
